Colombo, Sri Lanka

Computer Science undergraduate with experience developing full-stack web, desktop, and cross-platform mobile applications. Focused on designing and developing scalable backend systems, RESTful APIs, and efficient data-driven applications with modern frontend architectures.

EDUCATION

- University of Westminster (via Informatics Institute of Technology)** Colombo, Sri Lanka
Bachelor of Science in Computer Science Sep 2023 - Sep 2027
Courses: Object Oriented Programming, Client-Side Web Development, Server-Side Web Development, Database Systems, Client-Server Architectures, Software Development Group Project
- British Council** Colombo, Sri Lanka
Pearson Edexcel International Advanced Level (IAL) Oct 2020 - Oct 2022
Courses: Mathematics (B), Physics (B), Chemistry (D)

SKILLS SUMMARY

- Languages:** Python, Java, C#, JavaScript, TypeScript, PHP
- Frameworks:** React, Next.js, Node.js, Express, Spring Boot, Electron, Flutter, ASP.NET Core, WinUI 3
- Databases:** MySQL, PostgreSQL, SQLite, Microsoft SQL Server, MongoDB
- Tools:** Git, GitHub, Visual Studio Code, Visual Studio, Postman
- Soft Skills:** Research & Analysis, Conceptualization, Teamwork & Collaboration, Leadership, Adaptability

EXPERIENCE

- Digital Platforms, Sri Lanka Telecom (SLT)** Colombo, Sri Lanka
Software Engineering Intern (Full-time) Jun 2025 - Present
 - TalentTrail:** Built and deployed an internal web application used by 100+ trainees and administrators to manage trainee records and track dependencies across teams.
 - Agile Development:** Collaborated in an Agile (Scrum) environment with iterative sprints, participating in stand-ups and continuous feedback cycles to deliver features efficiently.
 - REST API Development:** Designed and exposed RESTful APIs with token federation to enable secure cross-application communication across web and mobile platforms.
 - GitHub & Bitbucket API Integration:** Implemented token-based authentication for retrieving repository data.
 - Streamlined deployment workflows:** Configured CI/CD pipelines using GitHub Actions to automate deployments.

PROJECTS

- Context (Desktop Application Development, Native Windows Development):** Developed a WinUI 3 whiteboard-style application enabling users to paste text, images, and drawings into a unified canvas and store all content in a single custom file for simplified resource management.
Tech: WinUI 3, .NET, C#, Windows App SDK, File I/O
- VidStash (Desktop Application Development, Media Management):** Developed a media library application that scans local folders, parses movie and TV show filenames, and organizes them into a Netflix-like interface, enabling users to browse, open media files, track watched status, and discover recommendations using TMDB metadata.
Tech: Electron, Node.js, SQLite, Tailwind CSS, File I/O
- Real-Time Ticketing System Simulator (Full-Stack Web Development, Multi-threading):** Engineered a full-stack web application featuring a responsive real-time UI and multi-threading, simulating real-world network traffic with synchronization to handle concurrency and prevent race conditions.
Tech: React, Spring Boot, PostgreSQL
- ZingEvents (Full-Stack Web Development, Concurrency Handling):** Developed a full-stack event booking platform with interactive SVG-based seating layout editing and real-time availability updates, implementing authentication, secure REST APIs, and backend validation to handle concurrent bookings and prevent conflicts.
Tech: React, ASP.NET Core, Microsoft SQL Server
- FreshTrack SL (Mobile Development, Cross-Platform, Linear Regression):** Developed a cross-platform app as a group, to reduce Sri Lankan crop wastage (SDG 12), integrating predictive analytics to forecast crop demand and optimize supply chain decisions as the 2nd-year Software Development group project.
Tech: Flutter, Android, Python, Supabase
